Attorney Docket No. PU4891USW

Amendments to the Abstract:

Please substitute the attached Abstract, which has been placed on a separate sheet of paper according to US practice, as required under 37 CFR 1.72(b).

ABSTRACT

A system for delivering a pharmaceutical formulation to a patient that includes a container having a pharmaceutical formulation including at least one medicament present therein, a metering assembly in communication with the container, and a tubular nozzle having an inlet configured in size to communicate with the metering assembly, and an outlet for directing the medicament to a patient is disclosed. The tubular nozzle preferably has a defined length and a longitudinal axis that is curvilinear through the defined length of the tubular nozzle.
